Centerboard Painter (Lifting System)	3

PLANS UPDATE

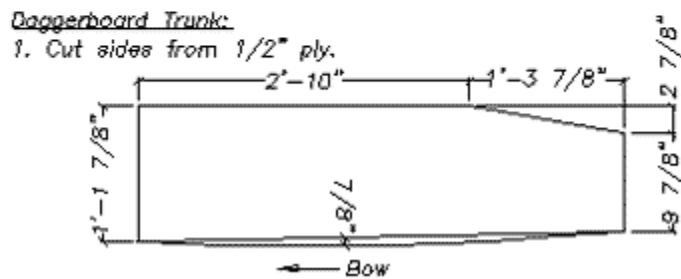

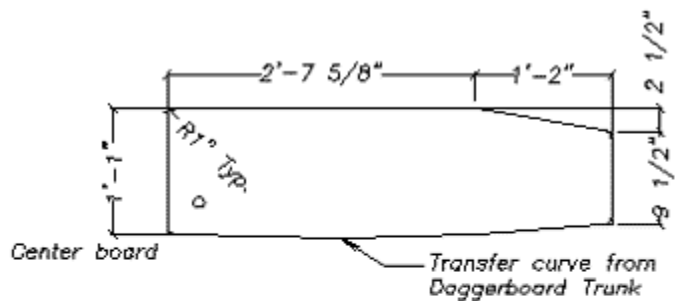

There were wrong dimensions on drawing 213/4.
 The profile view was scaled by 1.3 and all frame locations were wrong.
 Please email the order desk or support@e-boat.net to receive a PDF file with the corrected dimensions.

NESTING UPDATE

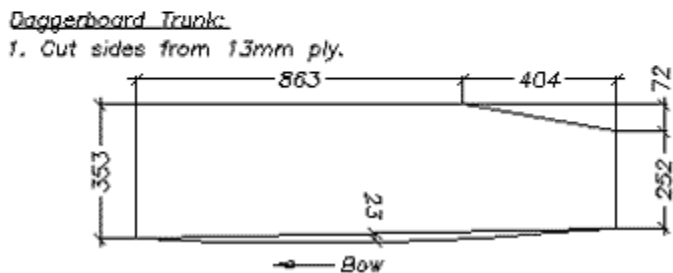

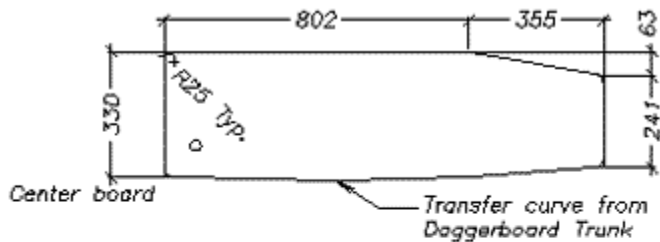

A new nesting drawing is available for this boat. A thicker bottom is shown, and it saves one sheet of 1/2" plywood compared to the old nesting drawing. All owners of CK17 plans can receive a free upgrade as a PDF file. Email OrderDesk@e-boat.net

C12 PLANS UPDATE

The dimensions were updated for the centerboard and daggerboard trunk.
 US units:

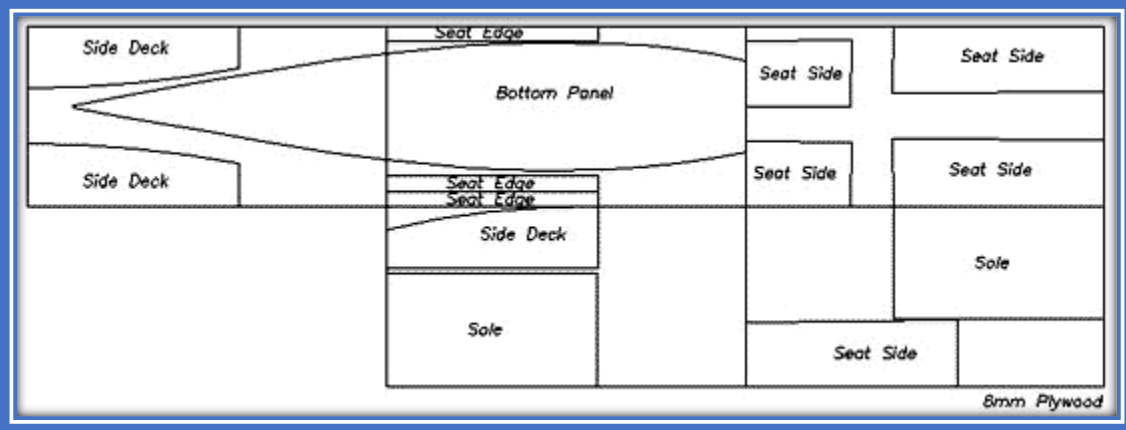

Metric:

AR15 NESTING UPDATE

For plans before February 2004, small nesting improvement.
In previous plans the seat sides were not nested properly. There is no change in the dimensions.
The sketch below shows the updated nesting.

CR13 UPDATE

There were a couple of dimensions missing on the plans:

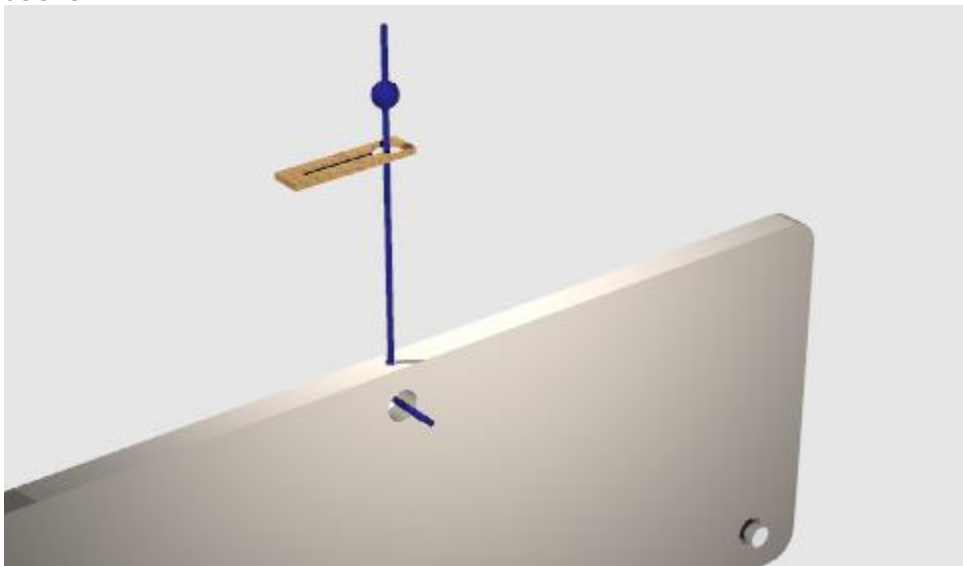

The distance from the bottom of the mast to the shroud attachment point is 172" [4369 mm].
The distance from the deck to the boom attachment point on the mast is 15 1/2" [394mm].
The distance from the center of the mast at the deck to the fairlead attachment on the deck is 36" [915 mm].

CV16 PERFORMANCE SAIL PLAN

All CV16 plans will now include 2 sail plans.
Along with the standard sail plan, the plans will now include a performance sail plan.
For those of you who have already bought the plans, you can email to OrderDesk@e-boat.net and we will send you a PDF.

CENTERBOARD PAINTER (LIFTING SYSTEM)

How to install an efficient CB painter.
For small boat centerboards, two holes and a stopper knot are all that is needed. [See the HowTo](#) in our Tutorials Section
